SUMMARY

Full-Stack Developer with experience building scalable and responsive web applications using React, Next.js, Node.js, MongoDB and MySQL. Skilled in developing and optimizing RESTful APIs, improving application performance, and implementing efficient data-fetching strategies. Proven ability to collaborate in cross-functional teams and deliver user-focused solutions. In addition, I am a motivated Electrical & Electronics Engineering graduate with hands-on experience in embedded systems, Arduino, circuit design, PCB design, and IoT. My background also includes proficiency in Python and a solid foundation in software development, enabling me to bridge the gap between hardware and software.

EXPERIENCE

Louby AI / DivVerse Labs

Nov 2025 - Present

Full-Stack Developer

- Developed responsive web applications from UI/UX designs using HTML, CSS, and JavaScript frameworks, ensuring cross-browser compatibility
- Collaborated with designers, product managers, and QA engineers through clear communication and version control, delivering end-to-end features
- Designed and optimized RESTful APIs with Node.js and Express, enabling seamless integration with front-end components and reducing response time
- Refactored authentication logic to improve performance and reduce unnecessary data fetching.
- Added MongoDB indexes to key query fields, which lowered query latency and improved overall database performance
- Resolved bugs and improved application stability.
- Maintained clean, scalable code through best practices and reviews.

Belsoft Systems Limited

May 2025 - Mar 2026

Frontend Developer

- Developed responsive user interfaces with React, Next.js, and TypeScript, delivering a consistent experience across devices
- Optimized frontend performance using TanStack Query and memoization.
- Collaborated on large-scale projects and improved frontend architecture.
- Trained students to build and deploy portfolio websites.
- Led a small team to deliver client projects on schedule, coordinating tasks and maintaining code quality throughout development

Kodnerds junior-senior dev challenge

Sep 2025 - Feb 2026

Frontend Developer

remote

- Collaborated in the Phoenix squad of the Junior-to-Senior Dev Challenge, working with senior mentors to learn, build, and grow together, and helped the squad meet all mentorship milestones
- Collaborated with a team of four to develop a service-booking application using Next.js, delivering a functional platform that enables users to schedule services online
- Worked with a team of three to create a project-management application using Next.js and Node.js/express, providing users a tool to track tasks and timelines

All Gates Systems Ltd

Mar 2025 - May 2025

Web Development Tutor

- Designed and delivered web development curriculum.
- Mentored students to build real-world portfolio projects.

Abuja Electricity Company

Jun 2024 - Mar 2025

Electrical Engineer

Abuja(onsite)

- Maintained distribution networks, feeders, and mini-substations using Proteus for schematic updates and GIS tools, ensuring reliable power delivery and reducing outage frequency
- Assisted in revenue collection and operations in a 33kV/11kV injection station
- Gained hands-on experience with electrical testing equipment-including voltage tester, earth tester, and Megger-to verify system integrity, supporting safe operation of the network

NCAIR

Oct 2023 - Dec 2023

Trainee

- Built an image-classification ML model with Python and TensorFlow, storing the training data in MySQL; the model correctly classified test images, enabling the prototype to demonstrate automated visual sorting
- Applied preprocessing and evaluation techniques.

MicroScale Embedded

Aug 2020 - Jan 2021

intern

Abuja(onsite)

- Assisted in training students for the Arduino starter kit course, preparing lesson materials and guiding hands-on sessions, which helped participants complete their first microcontroller projects
- Assisted embedded-system and IoT projects by programming Arduino Uno and ESP32 boards with the Arduino IDE and C++, enabling prototype development for sensor data collection

EDUCATION

University of Benin

2023

B.Eng., Electrical/Electronic Engineering

- **Achievements:** As part of a team of 8, I built a 2.5kVA pure sine wave inverter for our final year project., As part of a team of 4, I built a laser security system for our 571 course (Electronic Circuits II) project., As part of a team of 13, I built a digital clock using 7-segment displays and a 555 timer for our 371 course (Logic Design and Switching Theory) project in 300-level

PROJECTS

Ticket Booking Application | <https://hng-ticket-app.vercel.app>

- Built using Next.js and TypeScript with authentication and state management.
- Used local storage to persist user sessions.

Service Booking Application | <https://service-booking-app-chi.vercel.app>

- Developed frontend architecture using Next.js and TypeScript.
- Designed for future backend scalability.

Belsoft Markerting Landing page | <https://landing-page-pi-three-30.vercel.app/>

- React.js and tailwind css
- figma for the design

Phine Glow website | <https://phine-glow-hair-psi.vercel.app>

- next.js, tailwind and typescript
- I also did the design

Client dashboard | <https://konnnectu-next-app.vercel.app>

- next.js, CSS

Javascript projects | https://osigbemhe2020.github.io/javascript_projects

- HTML, CSS, javascript

Budget App | <https://new-budget-app-self.vercel.app/>

- React Tailwind css

IoT Enabled Water Management System

- using ultrasonic sensor and Atmega328p microcontroller

TRAINING & CERTIFICATIONS

- PCB design: Microscale embedded (2018)
- CCNA 1(introduction to networks): Cisco academy (2022)
- Python Essentials 1: Cisco academy (2023)
- Fundamentals of UX design: Coursera (2024)
- Responsive web design: freecodecamp (2025)
- Introduction to cybersecurity: Cisco academy (2022)
- Introduction to Software Engineering: IBM (2025)
- Introduction to HTML, CSS and JavaScript: IBM (2025)
- Getting Started with Git and GitHub: IBM (2025)
- JavaScript Programming Essentials: IBM (2025)
- Application Development using Microservices and Serverless: IBM (2025)
- Learn Tailwind CSS: Scriba (2025)
- Developing Back-End Apps with Node.js and Express: IBM (2025)
- Get Started with Cloud Native, DevOps, Agile, and NoSQL: IBM (2025)
- Introduction to Containers w/ Docker, Kubernetes & OpenShift: IBM (2025)
- Node.js & MongoDB: Developing Back-end Database Applications: IBM (2025)
- JavaScript Back-end Capstone Project: IBM (2025)
- Foundations of Project Management: Google (2025)
- Javascript Alogrithms and Data Structure: freecodeCamp (2025)

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, Bootstrap, React.js, Next.js, Sanity io, React native, Zustand, Redux, Typescript, UI/UX Design, Figma, WordPress
- **Backend Development:** MySQL, MongoDB, PHP, Node.js, Express
- **Embedded Systems & Hardware:** Circuit Design, Arduino Programming, PCB Design, Proteus, KiCad
- **Programming & Tools:** Python, Git, GitHub, Machine Learning, Deep learning
- **Soft Skills:** Communication, Public Speaking, Leadership, Teamwork, Project Management, Problem-Solving
- **Other Skills:** Microsoft Office, Word, Excel, Access, PowerPoint, Graphic Design, Photoshop, Canva
