SUMMARY

Full-Stack Developer with 2+ years of experience in delivering scalable, responsive web applications using React, Next.js, Node.js, MongoDB, and MySQL. Proven ability to optimize RESTful APIs, reduce query latency, and refactor authentication logic, significantly enhancing application performance and stability. Successfully led cross-functional teams to translate UI/UX designs into production-ready features, consistently meeting project deadlines and driving high-impact, user-focused solutions.

EXPERIENCE

Circo Orange Internship

Jul 2026 - Aug 2026

Backend Developer

remote

it is an 8-week program, collaborating within a cross-functional team that includes a frontend developer, product manager, UI/UX designer, and data analyst. We are tasked with delivering a solution for a real-world client brief

- Published the live project at <https://orbit-circle.vercel.app>, demonstrating the completed backend functionality for the CareerMap platform
- Selected as one of 100 participants from over 650 applicants across 10 countries for an intensive product development internship.
- Collaborated with a cross-functional team of frontend developers, product managers, UI/UX designers, and data analysts to deliver core backend features for the CareerMap platform
- Developed and refined design and backend components of CareerMap, enabling personalized career discovery for young users
- Engineered backend architecture, created RESTful APIs, designed PostgreSQL schemas, and organized sprint planning, which streamlined the development workflow
- Coordinated with stakeholders to translate client requirements into scalable software solutions, resulting in a deployable backend system aligned with business goals

Loubby AI / DivVerse Labs

Nov 2025 - Apr 2026

Full-Stack Developer intern

United States (remote)

company website: <https://www.loubby.ai/>

- Implemented the project's tech stack with Next.js, React, Node.js, TypeScript, MongoDB, Redis, and AWS, establishing a robust foundation for rapid development and scalable deployment
- Developed responsive web applications from UI/UX designs using HTML, CSS, TypeScript, and React, ensuring cross-browser compatibility and delivering a consistent user experience across all supported browsers
- Collaborated with designers, product managers, and QA engineers through clear communication and version control, delivering end-to-end features
- Designed and optimized RESTful APIs with Node.js and Express, enabling smooth integration with front-end components and cutting response time
- Refactored authentication logic to improve performance and reduce unnecessary data fetching.
- Added MongoDB indexes to key query fields, which lowered query latency and improved overall database performance
- Resolved front-end and back-end bugs using Node.js, TypeScript, and Chrome DevTools, resulting in a smoother user experience and fewer production incidents
- Maintained clean, scalable code by enforcing ESLint rules, applying TypeScript typings, and participating in peer code reviews on GitHub, which kept the codebase maintainable for future feature development

Belsoft Systems Limited

May 2025 - Feb 2026

Frontend Developer

Abuja (hybrid)

company website: <https://www.belsoftsystems.com/>

- Utilized Next.js, React.js, TailwindCSS, and TypeScript to build responsive user interfaces, ensuring a consistent experience across devices
- Improved website speed and user experience by optimizing frontend performance with TanStack Query and memoization, reducing data fetch times and unnecessary component re-renders.
- Collaborated with cross-functional teams on large-scale projects, refactoring the frontend architecture using React and Redux to improve code maintainability
- Led a small team to deliver client projects on schedule, coordinating tasks and maintaining code quality throughout development

Kodnerds junior-senior dev challenge

Sep 2025 - Feb 2026

Frontend Developer(part-time)

(remote)

company website: <https://www.kodnerds.com/>

- Built responsive front-end components with Next.js, React, TailwindCSS, and TypeScript, improving UI consistency across devices
- Collaborated in the Phoenix squad of the Junior-to-Senior Dev Challenge, working with senior mentors to learn, build, and grow together, and helped the squad meet all mentorship milestones
- Collaborated with a team of four to develop a service-booking application using Next.js, delivering a functional platform that enables users to schedule services online
- Worked with a team of three to create a project-management application using Next.js and Node.js/Express, providing users a tool to track tasks and timelines

All Gates Systems Ltd

Mar 2025 - May 2025

Web Development Tutor

Abuja (onsite)

- Taught HTML, CSS, and JavaScript to students, using hands-on exercises and Git for version control, resulting in functional web pages for each learner
- Designed and delivered a web development curriculum covering HTML, CSS, and JavaScript, using interactive workshops and GitHub for version control, which enabled students to complete capstone projects and demonstrate core coding skills
- Mentored students in building real-world portfolio projects with React.js and MySQL, guiding them through code reviews and GitHub collaboration, resulting in completed portfolios that showcased their abilities to potential employers

All Gates System Ltd

Dec 2023 - Mar 2025

intern

Abuja(onsite)

Built a foundation in Software Development, Python, cybersecurity, and networking concepts

- Gained exposure to software engineering practices and IT system
- Developed technical curiosity and problem-solving skills, marking the beginning of my software engineering career

EDUCATION

University of Benin

2023

B.Eng., Electrical/Electronic Engineering

- **Achievements:** As part of a team of 8, I built a 2.5kVA pure sine wave inverter for our final year project., As part of a team of 4, I built a laser security system for our 571 course (Electronic Circuits II) project., As part of a team of 13, I built a digital clock using 7-segment displays and a 555 timer for our 371 course (Logic Design and Switching Theory) project in 300-level

PROJECTS

CareerMap <https://orbit-circle.vercel.app>

Jul 2026 - Aug 2026

- Tech Stack: Next.js, Node.js, Express, PostgreSQL, JWT, REST APIs, Gemini API
- Developed a full-stack career guidance platform that uses an adaptive assessment engine to match students with suitable career paths, mentors, and industry insights.
- Designed and implemented RESTful APIs, JWT authentication, PostgreSQL database schemas, and real-time mentor-student messaging using Socket.io
- Built a weighted scoring algorithm and confidence-based matching system to generate personalized career recommendations

Budget App (Full-Stack Application) <https://new-budget-app-self.vercel.app/>

- Tech Stack: React, Node.js, Express, MySQL, JWT, REST APIs
- Implemented secure authentication and authorization with JWT.
- Designed relational database structures for multi-user financial management
- Developed RESTful APIs for income, expenses, savings, debt, and budgeting workflows
- Introduced user-specific data isolation

SecondChance (IBM Javascript backend Capstone project) <https://second-chance-6p4k.vercel.app/>

- Tech stack: React, tailwind css, Node.js, Express and mongodb
- Developed a full-stack marketplace application using Node.js, Express.js, and MongoDB that connects users looking to donate household items with users seeking reusable goods
- Revamped the existing Frontend
- Implemented RESTful APIs, secure authentication, item listing management, search and filtering capabilities, user profiles, and database integration as part of the IBM Back-End JavaScript Developer Capstone Project

Padolabs Website & Portfolio Platform <https://padolabs-website.vercel.app/>

- **Tech Stack:** Next.js, Styled components, Sanity io
- Developed a personal portfolio and content platform showcasing projects, services, technical articles, and learning journeys.

- Created a centralized hub for product showcases, developer content, and educational resources.
- Designed responsive interfaces with a focus on performance and user experience.

audophile-e-commerce <https://audophile-e-commerce-p9wn.vercel.app/>

Oct 2025 - Nov 2025

- Built a full-stack e-commerce application for audio products using Next.js, Tailwind CSS, Zustand, Sanity CMS, and NextAuth
- Implemented dynamic product pages, user authentication, and persistent user-specific shopping cart functionality using Zustand and local storage. Integrated Sanity CMS for dynamic product management

TRAINING & CERTIFICATIONS

- Kodnerds Junior-to-Senior Developer Program: kodnerds(2026)
- IBM Javascript Backend developer: IBM(2025)
- Javascript Algorithms and Data Structure: freeCodeCamp (2025)
- Responsive web design: freeCodeCamp (2025)
- Foundations of Project Management: Google (2025)
- Python Essentials 1: Cisco academy (2023)
- Fundamentals of UX design: Coursera (2024)

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, React.js, Next.js, Zustand, Typescript, Redux, Styled Components, Tailwind CSS
- **Backend Development:** PHP, Node.js, Express, REST APIs, JWT Authentication, Python, NestJS
- **Database:** PostgreSQL, MongoDB, MySQL, Redis
- **integrations:** sanity io, Supabase, Paystack, LLMs APIs
- **Programming & Tools:** Git, GitHub, Figma
- **Soft Skills:** Communication, Public Speaking, Leadership, Teamwork, Project Management, Problem-Solving
- **Mobile app development:** React Native
