SUMMARY

Full-Stack Developer with 2+ years of experience in delivering scalable, responsive web applications using React, Next.js, Node.js, MongoDB, and MySQL. Proven ability to optimize RESTful APIs, reduce query latency, and refactor authentication logic, significantly enhancing application performance and stability. Successfully led cross-functional teams to translate UI/UX designs into production-ready features, consistently meeting project deadlines and driving high-impact, user-focused solutions.

EXPERIENCE

Louppy AI / DivVerse Labs

Full-Stack Developer intern

Nov 2025 - Apr 2026

United States (remote)

- Implemented the project's tech stack with Next.js, React, Node.js, TypeScript, MongoDB, Redis, and AWS, establishing a robust foundation for rapid development and scalable deployment
- Developed responsive web applications from UI/UX designs using HTML, CSS, TypeScript, and React, ensuring cross-browser compatibility and delivering a consistent user experience across all supported browsers
- Collaborated with designers, product managers, and QA engineers through clear communication and version control, delivering end-to-end features
- Designed and optimized RESTful APIs with Node.js and Express, enabling smooth integration with front-end components and cutting response time
- Refactored authentication logic to improve performance and reduce unnecessary data fetching.
- Added MongoDB indexes to key query fields, which lowered query latency and improved overall database performance
- Resolved front-end and back-end bugs using Node.js, TypeScript, and Chrome DevTools
- Maintained clean, scalable code by enforcing ESLint rules, applying TypeScript typings, and participating in peer code reviews on GitHub, which kept the codebase maintainable for future feature development

Belsoft Systems Limited

Frontend Developer

May 2025 - Feb 2026

Abuja (hybrid)

- Utilized Next.js, React.js, TailwindCSS, and TypeScript to build responsive user interfaces, ensuring a consistent experience across devices
- Optimized frontend performance using TanStack Query and memoization.
- Collaborated with cross-functional teams on large-scale projects, refactoring the frontend architecture using React and Redux to improve code maintainability
- Led a small team to deliver client projects on schedule, coordinating tasks and maintaining code quality throughout development

Kodnerds junior-senior dev challenge

Frontend Developer(part-time)

Sep 2025 - Feb 2026

(remote)

- Utilized Next.js, React.js, TailwindCSS, and TypeScript to build responsive front-end components
- Collaborated in the Phoenix squad of the Junior-to-Senior Dev Challenge, working with senior mentors to learn, build, and grow together, and helped the squad meet all mentorship milestones
- Collaborated with a team of four to develop a service-booking application using Next.js , delivering a functional platform that enables users to schedule services online
- Worked with a team of three to create a project-management application using Next.js and Node.js/Express, providing users a tool to track tasks and timelines

All Gates Systems Ltd

Web Development Tutor

Mar 2025 - May 2025

Abuja (onsite)

- courses i taught : html , css and javascript
- Designed and delivered web development curriculum.
- Mentored students to build real-world portfolio projects.

All Gates System Ltd

intern

Dec 2023 - Mar 2025

Abuja(onsite)

Built a foundation in Software Development, Python, cybersecurity, and networking concepts

- Gained exposure to software engineering practices and IT system
- Developed technical curiosity and problem-solving skills, marking the beginning of my software engineering career

EDUCATION

University of Benin

2023

B.Eng., Electrical/Electronic Engineering

- **Achievements:** As part of a team of 8, I built a 2.5kVA pure sine wave inverter for our final year project., As part of a team of 4, I built a laser security system for our 571 course (Electronic Circuits II) project., As part of a team of 13, I built a digital clock using 7-segment displays and a 555 timer for our 371 course (Logic Design and Switching Theory) project in 300-level

PROJECTS

audophile-e-commerce <https://audophile-e-commerce-p9wn.vercel.app/>

Oct 2025 - Nov 2025

- Built a full-stack e-commerce application for audio products using Next.js, Tailwind CSS, Zustand, Sanity CMS, and NextAuth
- Implemented dynamic product pages, user authentication, and persistent user-specific shopping cart functionality using Zustand and local storage. Integrated Sanity CMS for dynamic product management

Invoice Management App <https://invoice-management-app-ivory.vercel.app/>

Apr 2026 - Apr 2026

- Developed a responsive invoice management application using React and Styled Components, implementing invoice creation, editing, deletion, status tracking, and filtering functionality.
- Built reusable UI components and a scalable styling system with Styled Components, improving maintainability, consistency, and code reusability across the application

Ticket Booking Application <https://hng-ticket-app.vercel.app>

Oct 2025 - Oct 2025

- Built a responsive ticket management system using React, Next.js, and Tailwind CSS
- features include authentication, protected routes, ticket CRUD operations, form validation, and user-specific data handling. Implemented a dashboard for ticket statistics and status management while focusing on scalable component structure, responsive UI, and state management

Insighta Labs <https://site--hng14-backend--nlrjqkv9zhwn.code.run>

Apr 2026 - Apr 2026

- Designed and developed a REST API using Node.js, Express.js, and MongoDB, integrating third-party APIs, implementing data persistence, validation, natural language filtering, error handling, and scalable backend architecture.

PaySlip

- Built a full-stack payroll and payslip management system using HTML, CSS, JavaScript, and PHP
- Implemented dynamic payslip generation, PDF export functionality, and email integration for automated payslip delivery while managing frontend/backend responsibilities and data flow

TRAINING & CERTIFICATIONS

- IBM Javascript Backend developer: IBM(2025)
- Javascript Algorithms and Data Structure: freeCodeCamp (2025)
- Responsive web design: freeCodeCamp (2025)
- Foundations of Project Management: Google (2025)
- Python Essentials 1: Cisco academy (2023)
- Fundamentals of UX design: Coursera (2024)

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, Bootstrap, React.js, Next.js, Sanity io, React native, Zustand, Typescript, UI/UX Design, Figma, WordPress, Redux
- **Backend Development:** MySQL, MongoDB, PHP, Node.js, Express, Redis
- **Programming & Tools:** Python, Git, GitHub, Machine Learning, Deep learning
- **Soft Skills:** Communication, Public Speaking, Leadership, Teamwork, Project Management, Problem-Solving
